Toddler Program

The Toddler Program has been designed specifically to meet the needs, natural curiosity, and interests of children from 18 months to three years of age. We offer a stimulating learning environment, which promotes cognitive and gross motor development, the development of the senses, language, eye-hand co-ordination, independence and self-esteem. Many opportunities for self-expression through music and arts and crafts are offered.

For this age group and at this level of development, language is a sensorial process, therefore the two adults guiding the environment will each be directing themselves either in English or Spanish.

Children's House Program

The goal of Mountain West Montessori's Children's House is to nourish independence and to aid the children to move toward a mastery of self and the environment. The Montessori Children's House classrooms are prepared environments designed to encourage children in their self-directed discovery of the world. Interest based activities encourage children to develop a love of learning and trust in their own ability to learn.

Fundamental to Montessori philosophy is the classroom with different age groups. Each Children's House Classroom includes children ages three to six, and children may work individually or in small groups, learning from and sharing with

Elementary

The Mountain West Montessori elementary program works with the understanding that the children are undergoing the challenge of discovering their place within a group and within a society as a whole. This is why much of the activities in the elementary happen in groups, with children sharing and working together in collaboration and experimenting with the material together. The hum of discussion, challenging questions and debate fill the elementary classroom at Mountain West Montessori.
